**Public Health Groups Invest in
National Evaluation of Social Determinants of Health**

*—42 Community Partnerships to Receive \$2 Million to
Evaluate National Projects that Advance Health Equity—*

Washington, DC, February 11, 2021 — The [National Association of County and City Health Officials](#) (NACCHO), the voice of the country's nearly 3,000 local health departments, and the [Association of State and Territorial Health Officials](#) (ASTHO), the national nonprofit organization representing public health agencies in the United States, have selected 42 community multi-sector partnerships/coalitions across the country to receive over \$2 million as a part of the Improving Social Determinants of Health – Getting Further Faster evaluation program.

Selected communities have a demonstrated impact in advancing health equity by addressing social determinants of health and will participate in a national retrospective evaluation to understand the impact of recent social determinants of health (SDoH) experiences and highlight successful strategies. The SDoH are conditions in the environments in which people are born, live, learn, work, play, worship, and age that affect a wide range of health, functioning, and quality-of-life outcomes and risks. The national evaluation focuses on five areas of SDoH directly linked to chronic disease:

- **Built Environment:** Human-made surroundings that influence overall community health and individual behaviors that drive health
- **Community-Clinical Linkages:** Connections made among health care systems and services, public health agencies, and community-based organizations to improve population health
- **Food Insecurity:** An economic and social condition characterized by limited or uncertain access to adequate and nutritious food
- **Social Connectedness:** The degree to which individuals or groups of individuals have and perceive a desired number, quality, and diversity of relationships that create a sense of belonging and being cared for, valued, and supported
- **Tobacco-Free Policy:** Population-based preventive measures to reduce tobacco use and tobacco-related morbidity and mortality.

“The importance of this initiative cannot be understated. This project will help to advance healthy equity through meaningful, scalable projects that encompass the built environment, food insecurity, social connectedness, and tobacco-free policies, among others. This bold, comprehensive approach to addressing the social determinants will not only benefit the selected communities but will also provide an important platform to share and adopt best practices across the country,” said NACCHO CEO Lori Tremmel Freeman.

“This project is a significant step towards establishing policy best practices for social determinants of health,” says ASTHO Chief Medical Officer Marcus Plescia. “We know that addressing these determinants improves community health and saves precious resources. This research will help jurisdictions nationwide move forward with proven, evidence-based policies that create healthier communities.”

Complementary technical assistance will also be provided to the selected coalitions to support their program evaluation, communications, partnership development, health equity, and sustainability efforts related to employing SDoH approaches to improving chronic disease.

The selected partnerships/coalitions and lead organizations are:

- Access Health Stark County, Inc. – Canton, OH
- Acenda Integrated Health – Glassboro, NJ
- ACHIEVE Coalition, Multnomah County Health Department – Portland, OR
- Active Knox, Knox County Health Department – Knoxville, TN
- Adirondack Food System Alliance, Adirondack Health Institute – Glens Fall, NY
- Allies in Caring, Inc., The Hammonton Health Coalition – Hammonton, NJ
- Asian American Center of Frederick – Frederick, MD
- Avondale Children Thrive Collaborative, The Community Builders – Cincinnati, OH
- Be Well™ Baytown, University of Texas MD Anderson Cancer Center – Houston, TX
- BPSOS Center for Community Advancement – Westminster, CA
- Buffalo Tobacco Action, Cicatelli Associates, Inc – Buffalo, NY
- Central Lincoln County YMCA, Lincoln Health CLC YMCA – Damariscotta, ME
- Centura Health Food Security Coalition, Centura Health & Jefferson County Public Health – Jefferson County, CO
- Community Connections, Reading Hospital – Reading, PA

CDC’s National Center for Chronic Disease Prevention and Health Promotion awarded funds for this pilot project through the Strengthening Public Health Systems and Services Through National Partnerships (CDC-RFA-OT18-1802) cooperative agreement. The purposes of the cooperative agreement are to strengthen the nation’s public health infrastructure; ensure a competent, current, and connected public health system; and improve the delivery of the 10 essential public health services.

###

About NACCHO

The National Association of County and City Health Officials (NACCHO) represents the nation’s nearly 3,000 local health departments. These city, county, metropolitan, district, and tribal departments work every day to protect and promote health and well-being for all people in their communities. For more information about NACCHO, please visit www.naccho.org.

About ASTHO

The Association of State and Territorial Health Officials (ASTHO) is the national nonprofit organization representing public health agencies in the United States, the U.S. Territories, and the District of Columbia, and over 100,000 public health professionals these agencies employ. ASTHO members, the chief health officials of these jurisdictions, formulate and influence sound public health policy and ensure excellence in state-based public health practice. ASTHO's primary function is to track, evaluate, and advise members on the impact and formation of public or private health policy which may affect them and to provide them with guidance and technical assistance on improving the nation's health. For more information, please visit www.astho.org
