

Leveraging Data to Support Infection Preventionists: Insights & Strategic Priorities from a Comprehensive Needs Assessment

Amy Encinger, PhD
University of Nebraska Medical Center
Global Center for Health Security

UNMC | NEBRASKA MEDICINE
**GLOBAL CENTER
FOR HEALTH SECURITY**

Project Firstline is a national collaborative led by the U.S. Centers for Disease Control and Prevention (CDC) to provide infection control training and education to frontline healthcare workers and public health personnel. National Association of County and City Health Officials (NACCHO) is proud to partner with Project Firstline to host the NACCHO Healthcare Infection Prevention and Control Summit (Summit), as supported through CDC Grant # 6NU38OT000306-03-05. CDC is an agency within the Department of Health and Human Services (HHS). This presentation is being hosted as part of the Summit; the contents of this presentation and Summit do not necessarily represent the policies of CDC or HHS and should not be considered an endorsement

Presentation Overview

OBJECTIVES

BACKGROUND

PURPOSE

METHODOLOGY

RESULTS

KEY TAKEAWAYS &
CONCLUSIONS

NEXT STEPS

QUESTIONS

Objectives

- Assess Infection Preventionist Needs
- Identify Focus Areas
- Encourage Collaboration

Infection Prevention & Control: A Critical Need

- **Essential for Safety:** Crucial in safeguarding patients and healthcare workers
- **Pandemic Impact:** COVID-19 highlighted critical IPC roles and existing gaps (Martinez et al., 2023)
- **Key Challenges:**
 - Disparities in healthcare worker expertise (Martinez et al., 2023)
 - Structural issues in training programs (CDC, 2021; Martinez et al., 2023)
 - Limited resources in small, rural hospitals

Evolving Demands & Responses in IPC

- **Increased Recognition & Demand:** Frontline IPs saw a rise in demand for pandemic planning and response skills (Houben, 2024; Rebmann et al., 2023).
- **Workforce Challenges:**
 - Difficulty in retaining and recruiting skilled IPs, with high vacancy rates and anticipate retirements (Rebmann et al., 2023; Vassallo et al., 2019)

Purpose of Needs Assessment

- **Inform resource development**
- Identify priorities
- Facilitate collaboration
- Benchmarking & evaluation
- Advocacy and resource allocation

Methods

HAI/AR Director Needs Assessment

- Collected May – July 2023
 - Individual survey links emailed directly to HAI/AR Directors
 - 113 unique emails sent out
 - 38 completed
 - 34% response rate

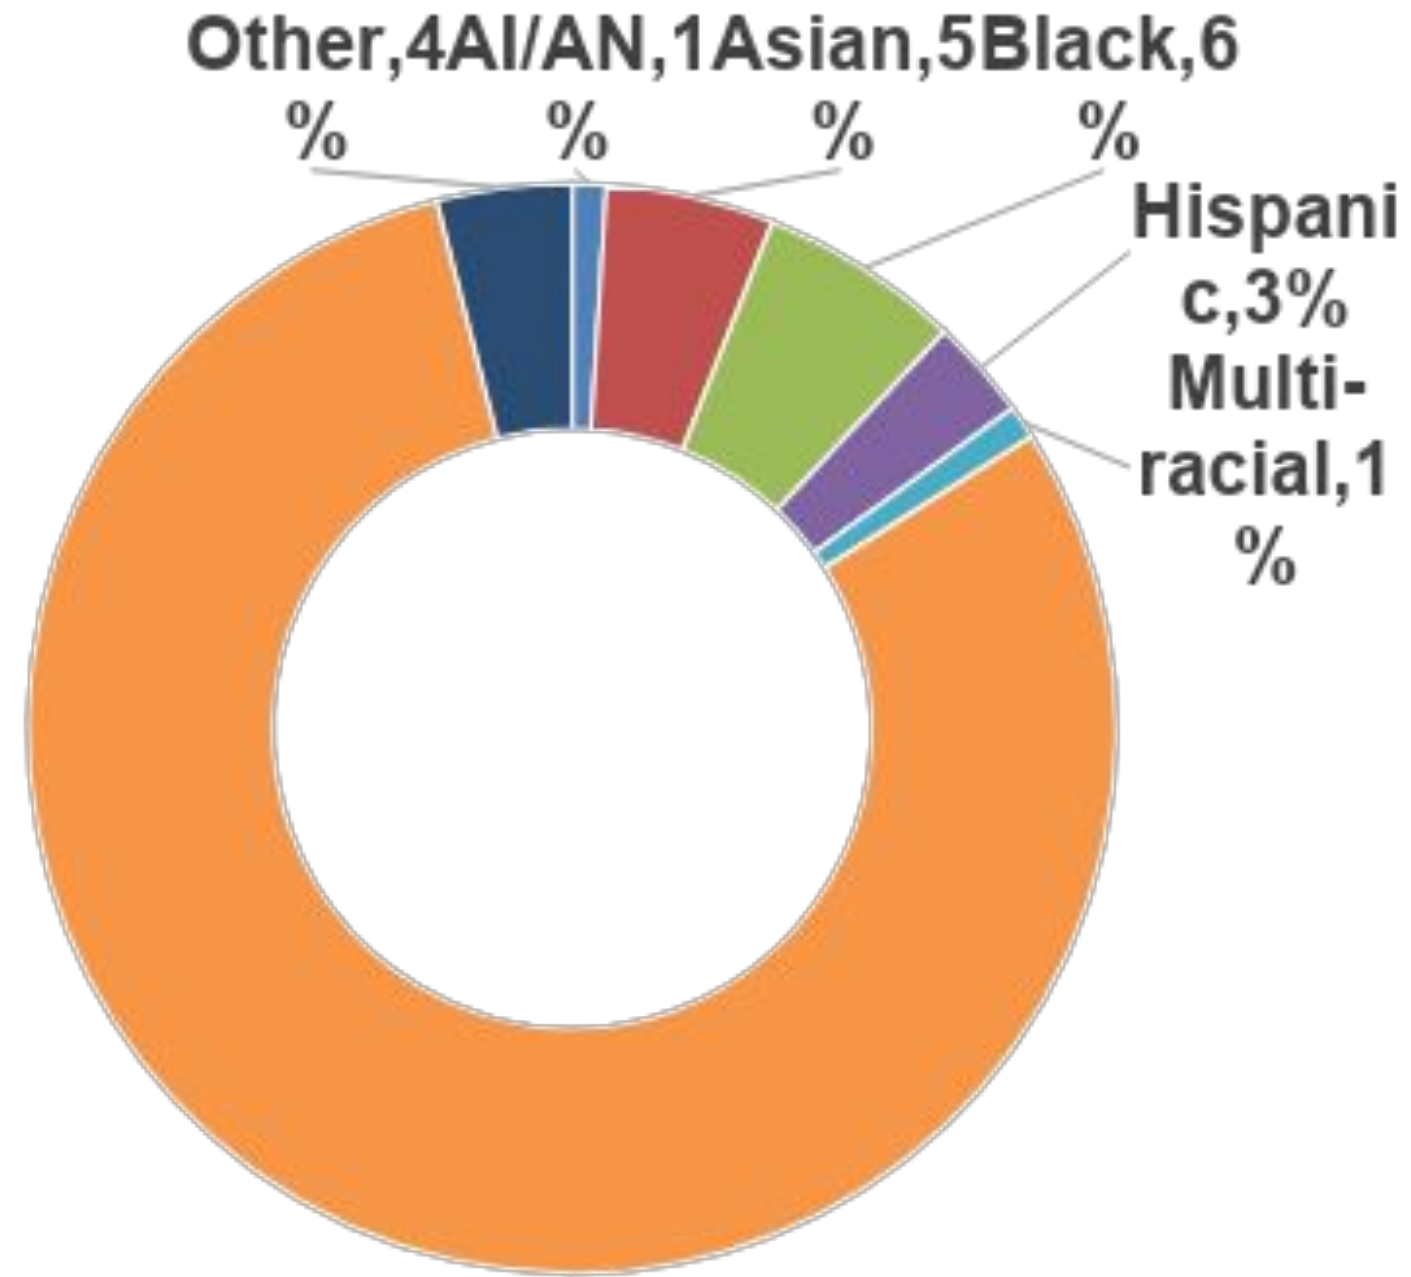

Infection Preventionist Needs Assessment

- Collected June - August 2023
 - HAI/AR Directors, APIC chapters, contacts, webinars, QR code at APIC conference
 - 309 completed
 - 267 IPs, 42 other

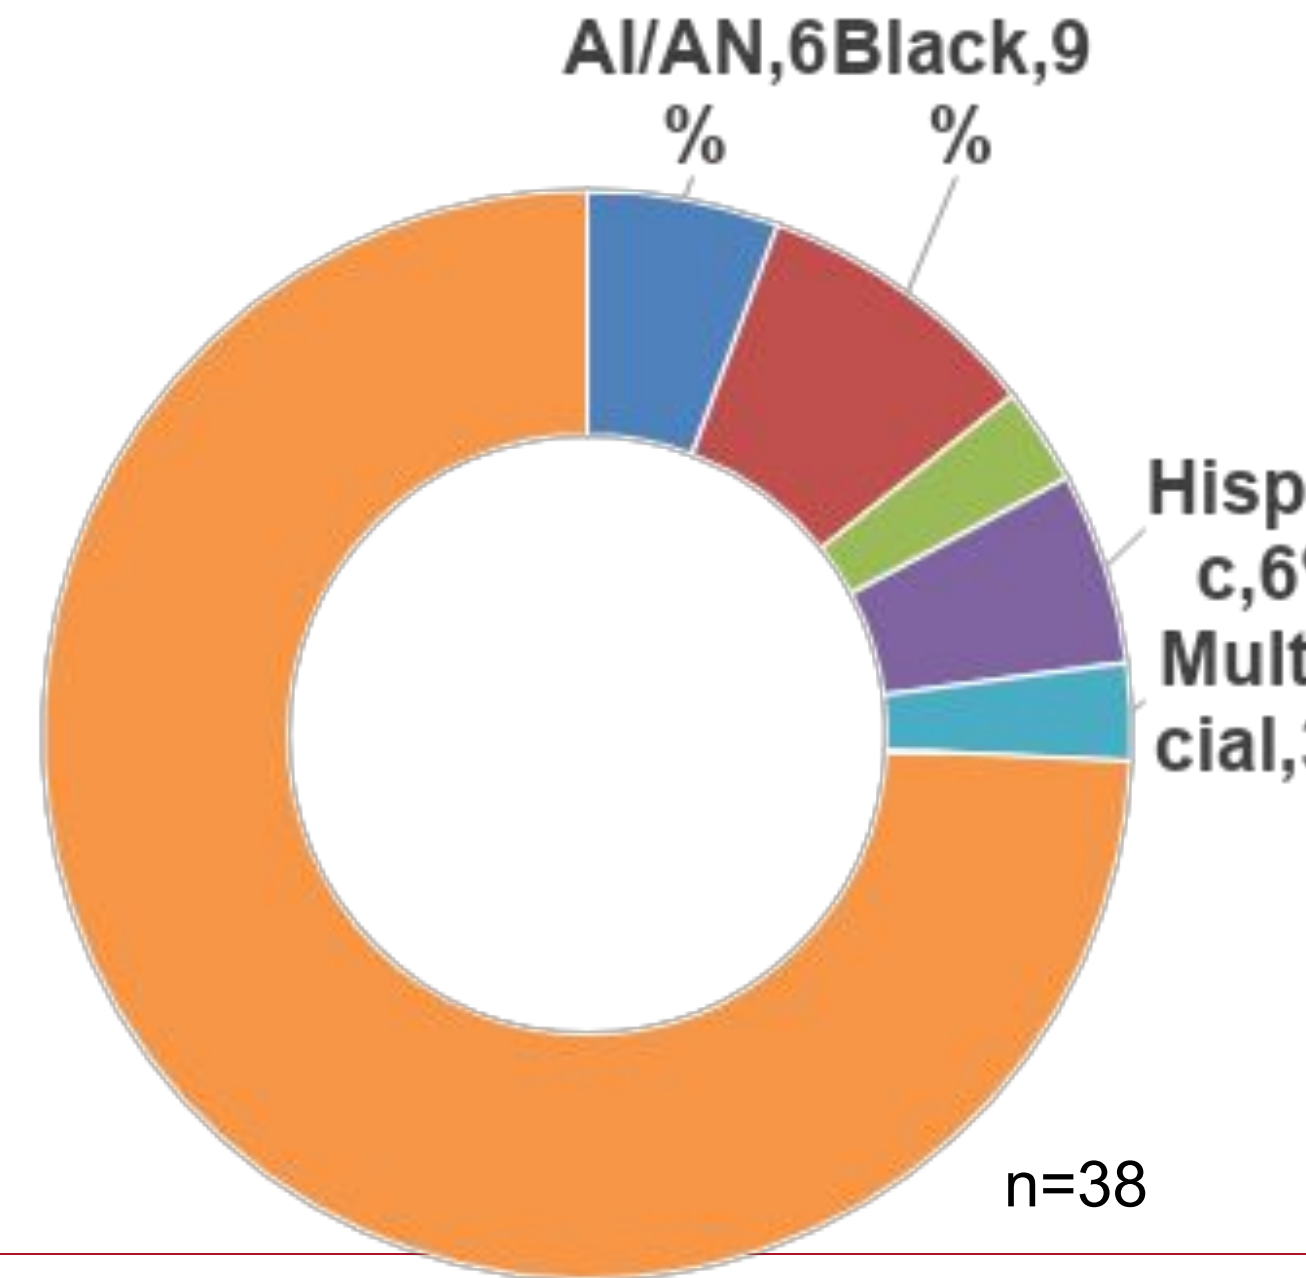

Demographics

IP Race Ethnicity

n=267

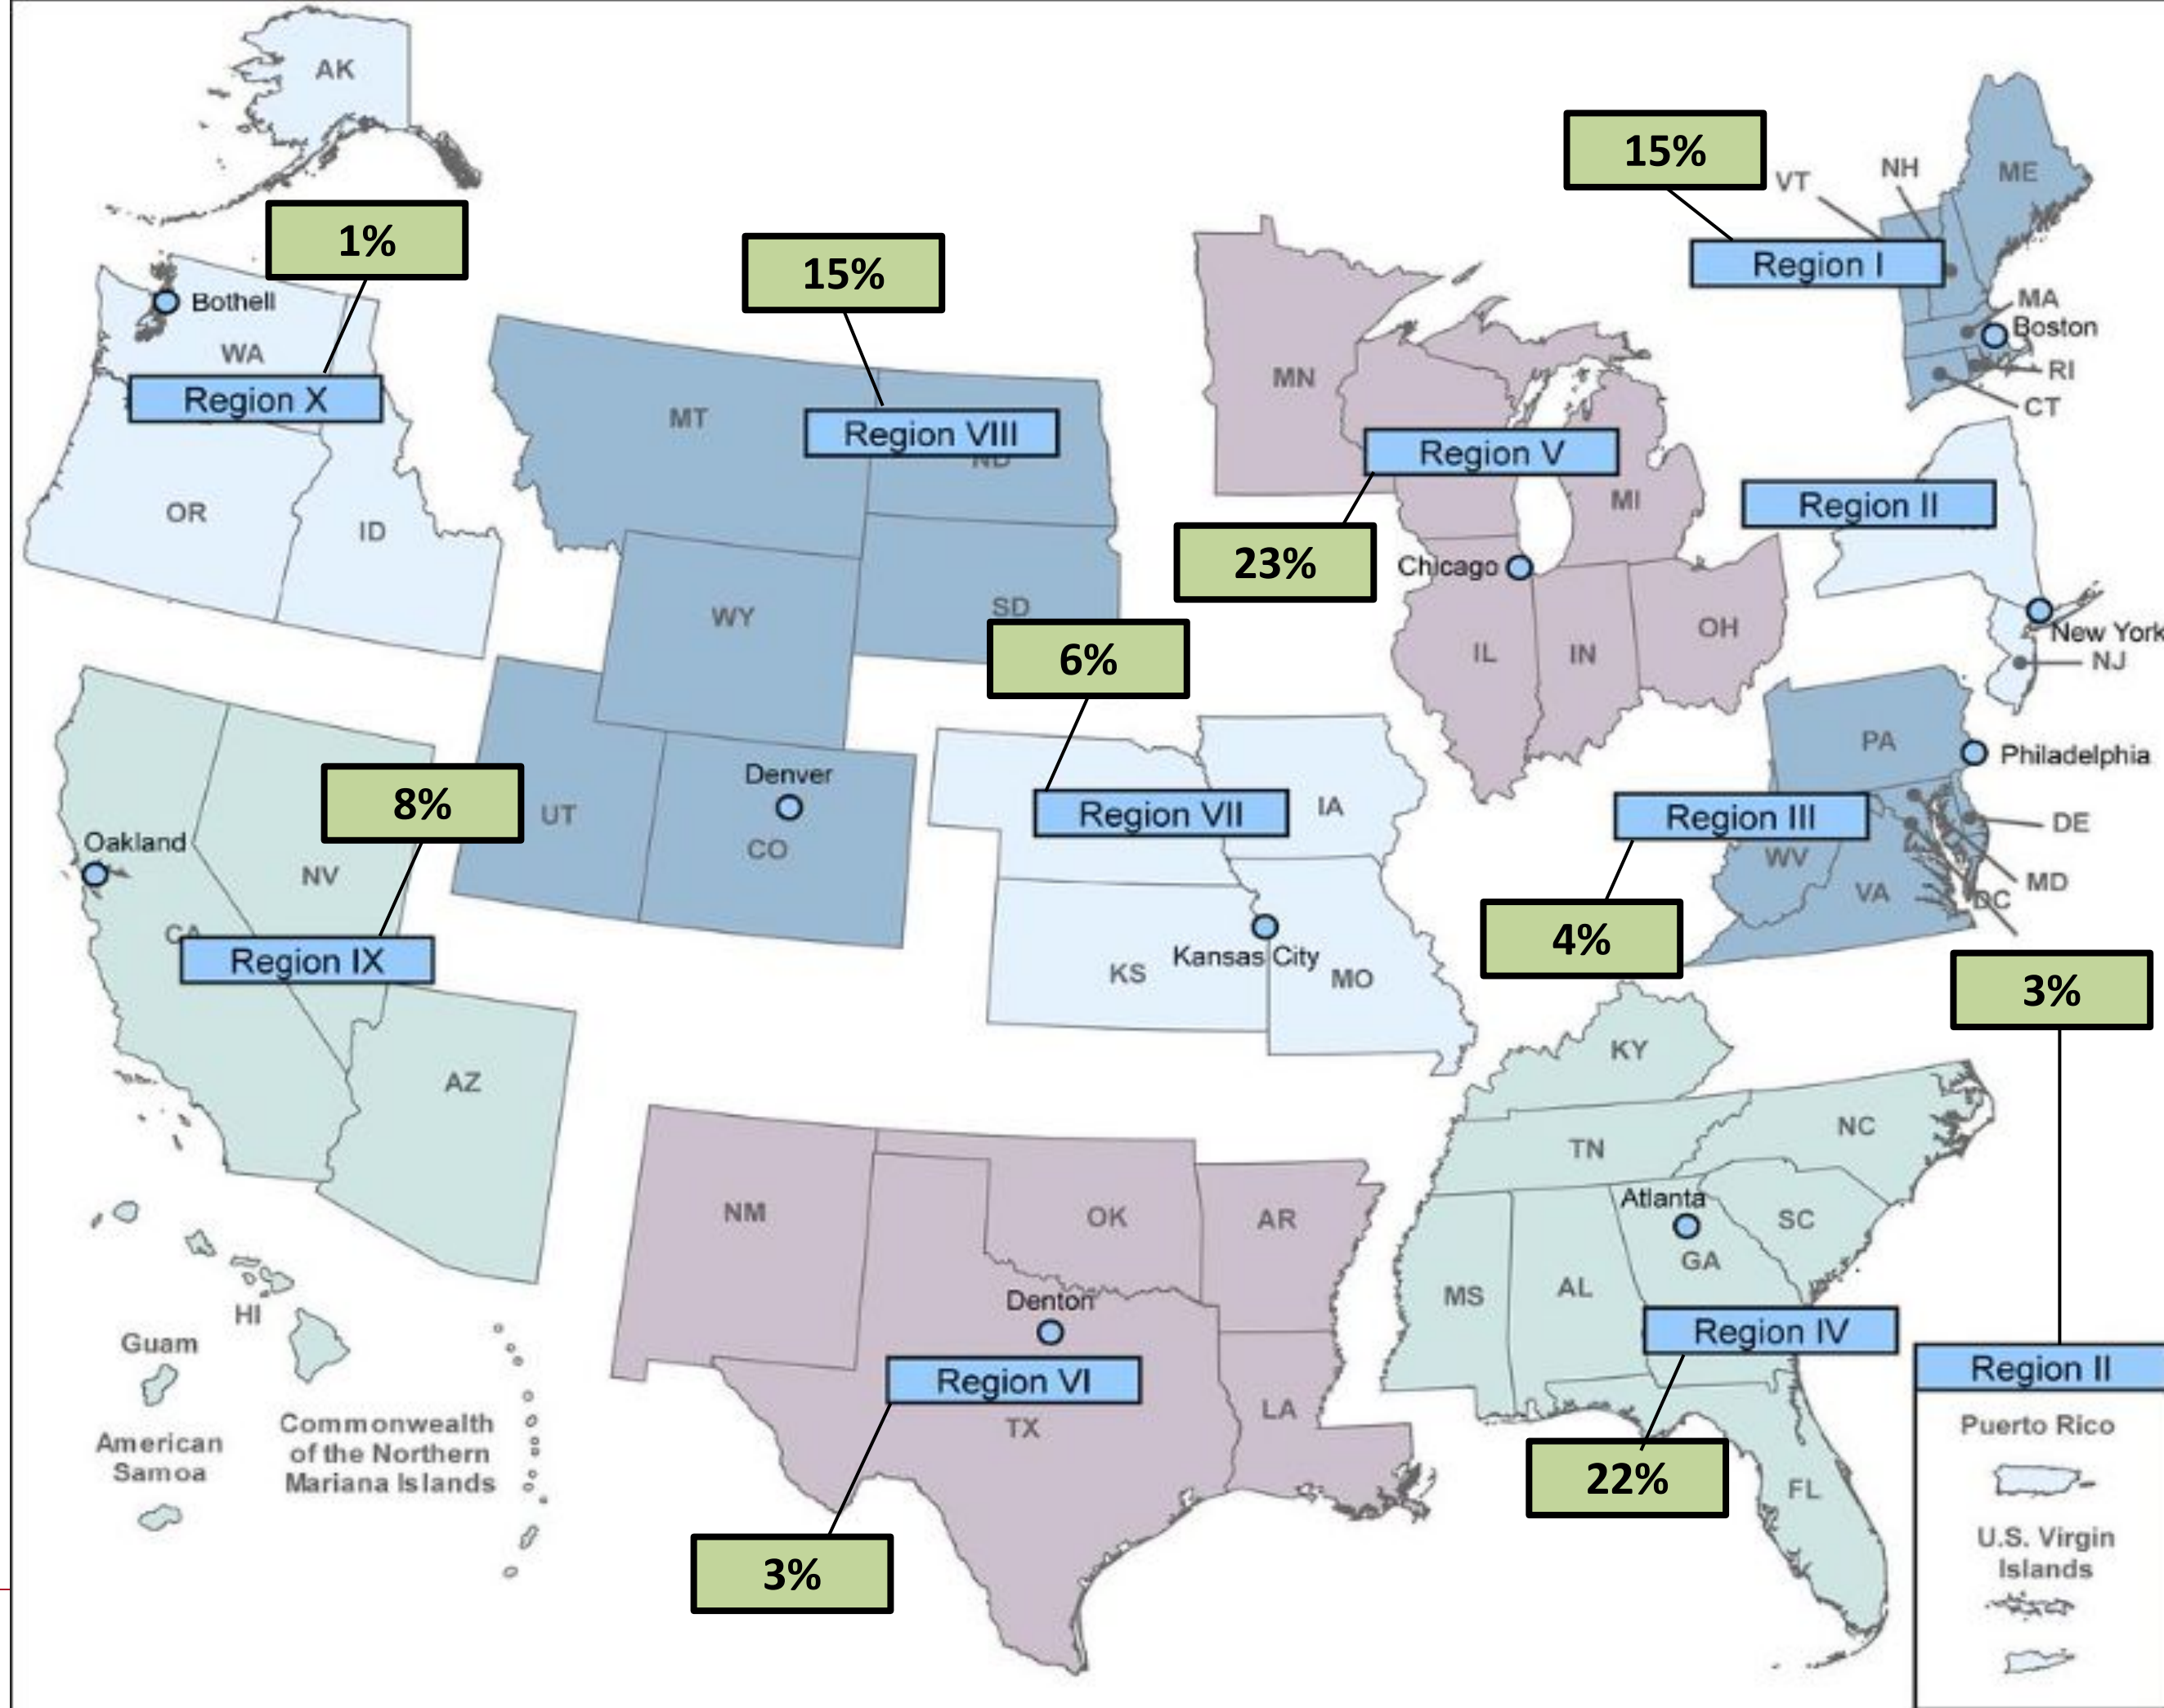

HAI/AR Race Ethnicity

n=38

IP Needs Assessment completion by region

Source: Federal Emergency Management Agency. | GAO-16-38

Years of IPC Experience

Time in Current Role

IPC Years of Experience x Facility Size

FTEs &

Hours Dedicated to IPC Program

41% of IP respondents indicated that they serve multiple roles (e.g., Quality, Employee Health, Safety, Nursing related role) in their facility, in addition to being an IP

Facility FTEs Dedicated to IPC Program

Hours Per week dedicated to IPC program

n=267

FTEs Dedicated to IPC Program x Facility Size

73% of IP programs with <1 FTE (n=33) dedicate **25 hours or less** to their facility's infection prevention program.

Results

- **Relationships**
- Concerns
- Training Availability & Needs
- Resource Needs

Relationships: Support & Engagement

Hospital Leadership and IP Programs: HAI/AR Director Insights

- **Engagement:** 74% report active leadership engagement
- **Understanding:** 67% understand the role of IPC
- **Support:** 63% supportive of IP programs
- **Prioritization:** 59% view IPC practices as a priority

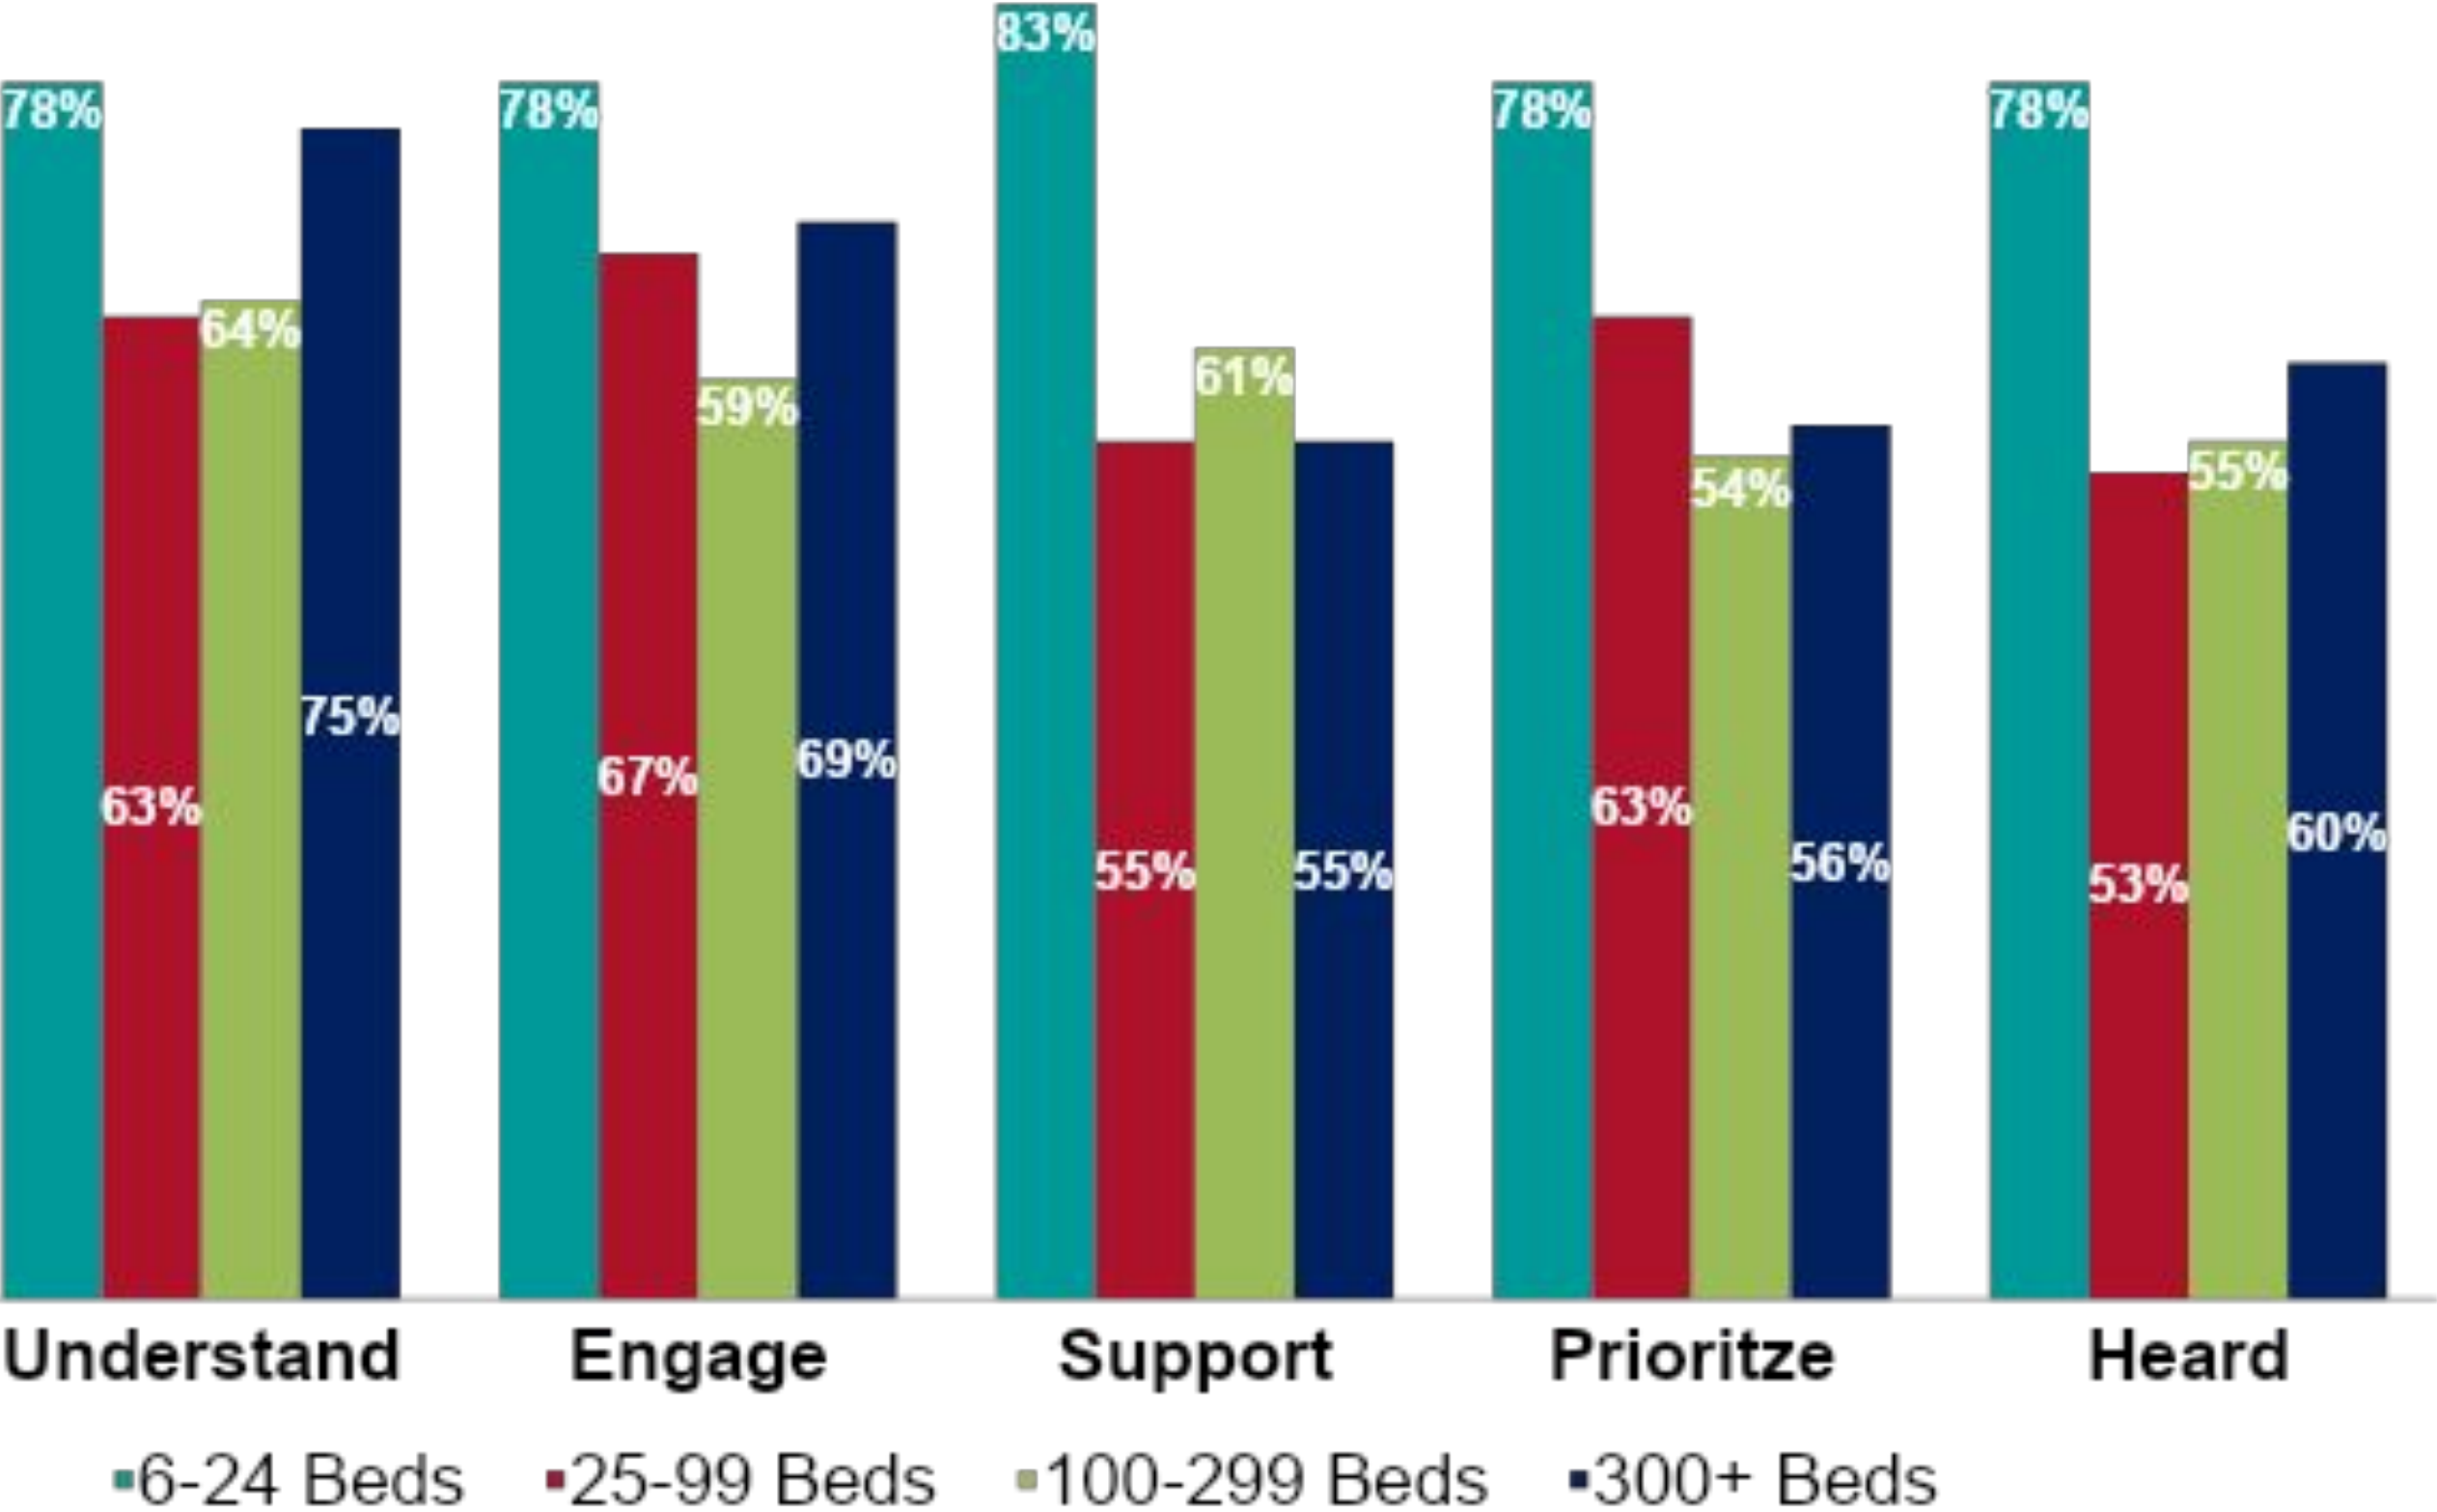

Hospital Leadership and IP Programs: IP Insights

- **Engagement:** 66% report active leadership engagement
- **Understanding:** 68% understand the role of IPC
- **Support:** 59% supportive of IP programs
- **Prioritization:** 59% view IPC practices as a priority

58% of IPs feel heard by hospital leadership when voicing concerns about the IPC program at their facility

Facility Leadership IPC Support & Engagement X Facility Size

>50% of IPs across all facility sizes report positive relationships with their facility leadership.

>75% of IPs at CAH facilities report positive relationships with their facility leadership.

n=260

Relationships: Collaboration & Communication

Collaboration & Communication: HAI/AR Director Insights

- **Collaborative Relationships:** 100% report strong collaborations with IPs and hospitals
- **IPs Understanding of Contact Protocols:** 97% understand when to contact HAI/AR team
- **Hospital Leadership Understanding of Contact Protocols:** 83% supportive of IP programs

Collaboration & Communication: IP Insights

- **Collaborative Relationships:** 63% report strong collaborations with HAI/AR leaders
- **IPs Understanding of When to Contact:** 74% understand when to contact HAI/AR team
- **Understanding of Who to Contact:** 70% with questions or concerns

63% of IPs are aware of the work the HAI/AR program does to support IPC in their state/territory

Awareness & Collaboration with HAI/AR Programs

- Awareness is high: Most respondents from facilities of all sizes are aware of HAI/AR program support
- **Contact Clarity:** Small facilities most confident about who to contact
- **Contact Understanding & Collaboration:** Knowing who to contact is most reported by 25-99 bed facilities. Strongest collaboration is noted in 100-299 bed facilities

Relationships Matter

Significant positive associations between IP job satisfaction and hospital leadership's :

- Support for job responsibilities and program goals
- Responsiveness to concerns voiced about IPC programs

Significant negative associations between IP role strain and job stress and hospital leadership's :

- Engagement with IP program
- Prioritization of IPC practices
- Support for job responsibilities and program goals
- Responsiveness to concerns voiced about IPC programs

**GLOBAL CENTER
FOR HEALTH SECURITY**

Concerns

- 100% of HAI/AR directors are concerned about IP turnover
- 88% reported that IP turnover is high in their state/territory
- 89% are worried about the availability of affordable, quality IP training

Concerning HAIs

- 76% of HAI/AR Directors are moderately to extremely concerned about HAIs in their state territory.
- 41% of IPs are moderately to extremely concerned about HAIs in their facility.

IPC Training Availability & Needs

Ongoing IPC training opportunities

UNMC | NEBRASKA MEDICINE
GLOBAL CENTER
FOR HEALTH SECURITY

61% of IPs indicated the training and professional development opportunities available to them at their facility are somewhat adequate to adequate.

57% of IPs reported that they are somewhat to extremely concerned about the availability of affordable, quality training relation to IP professional development

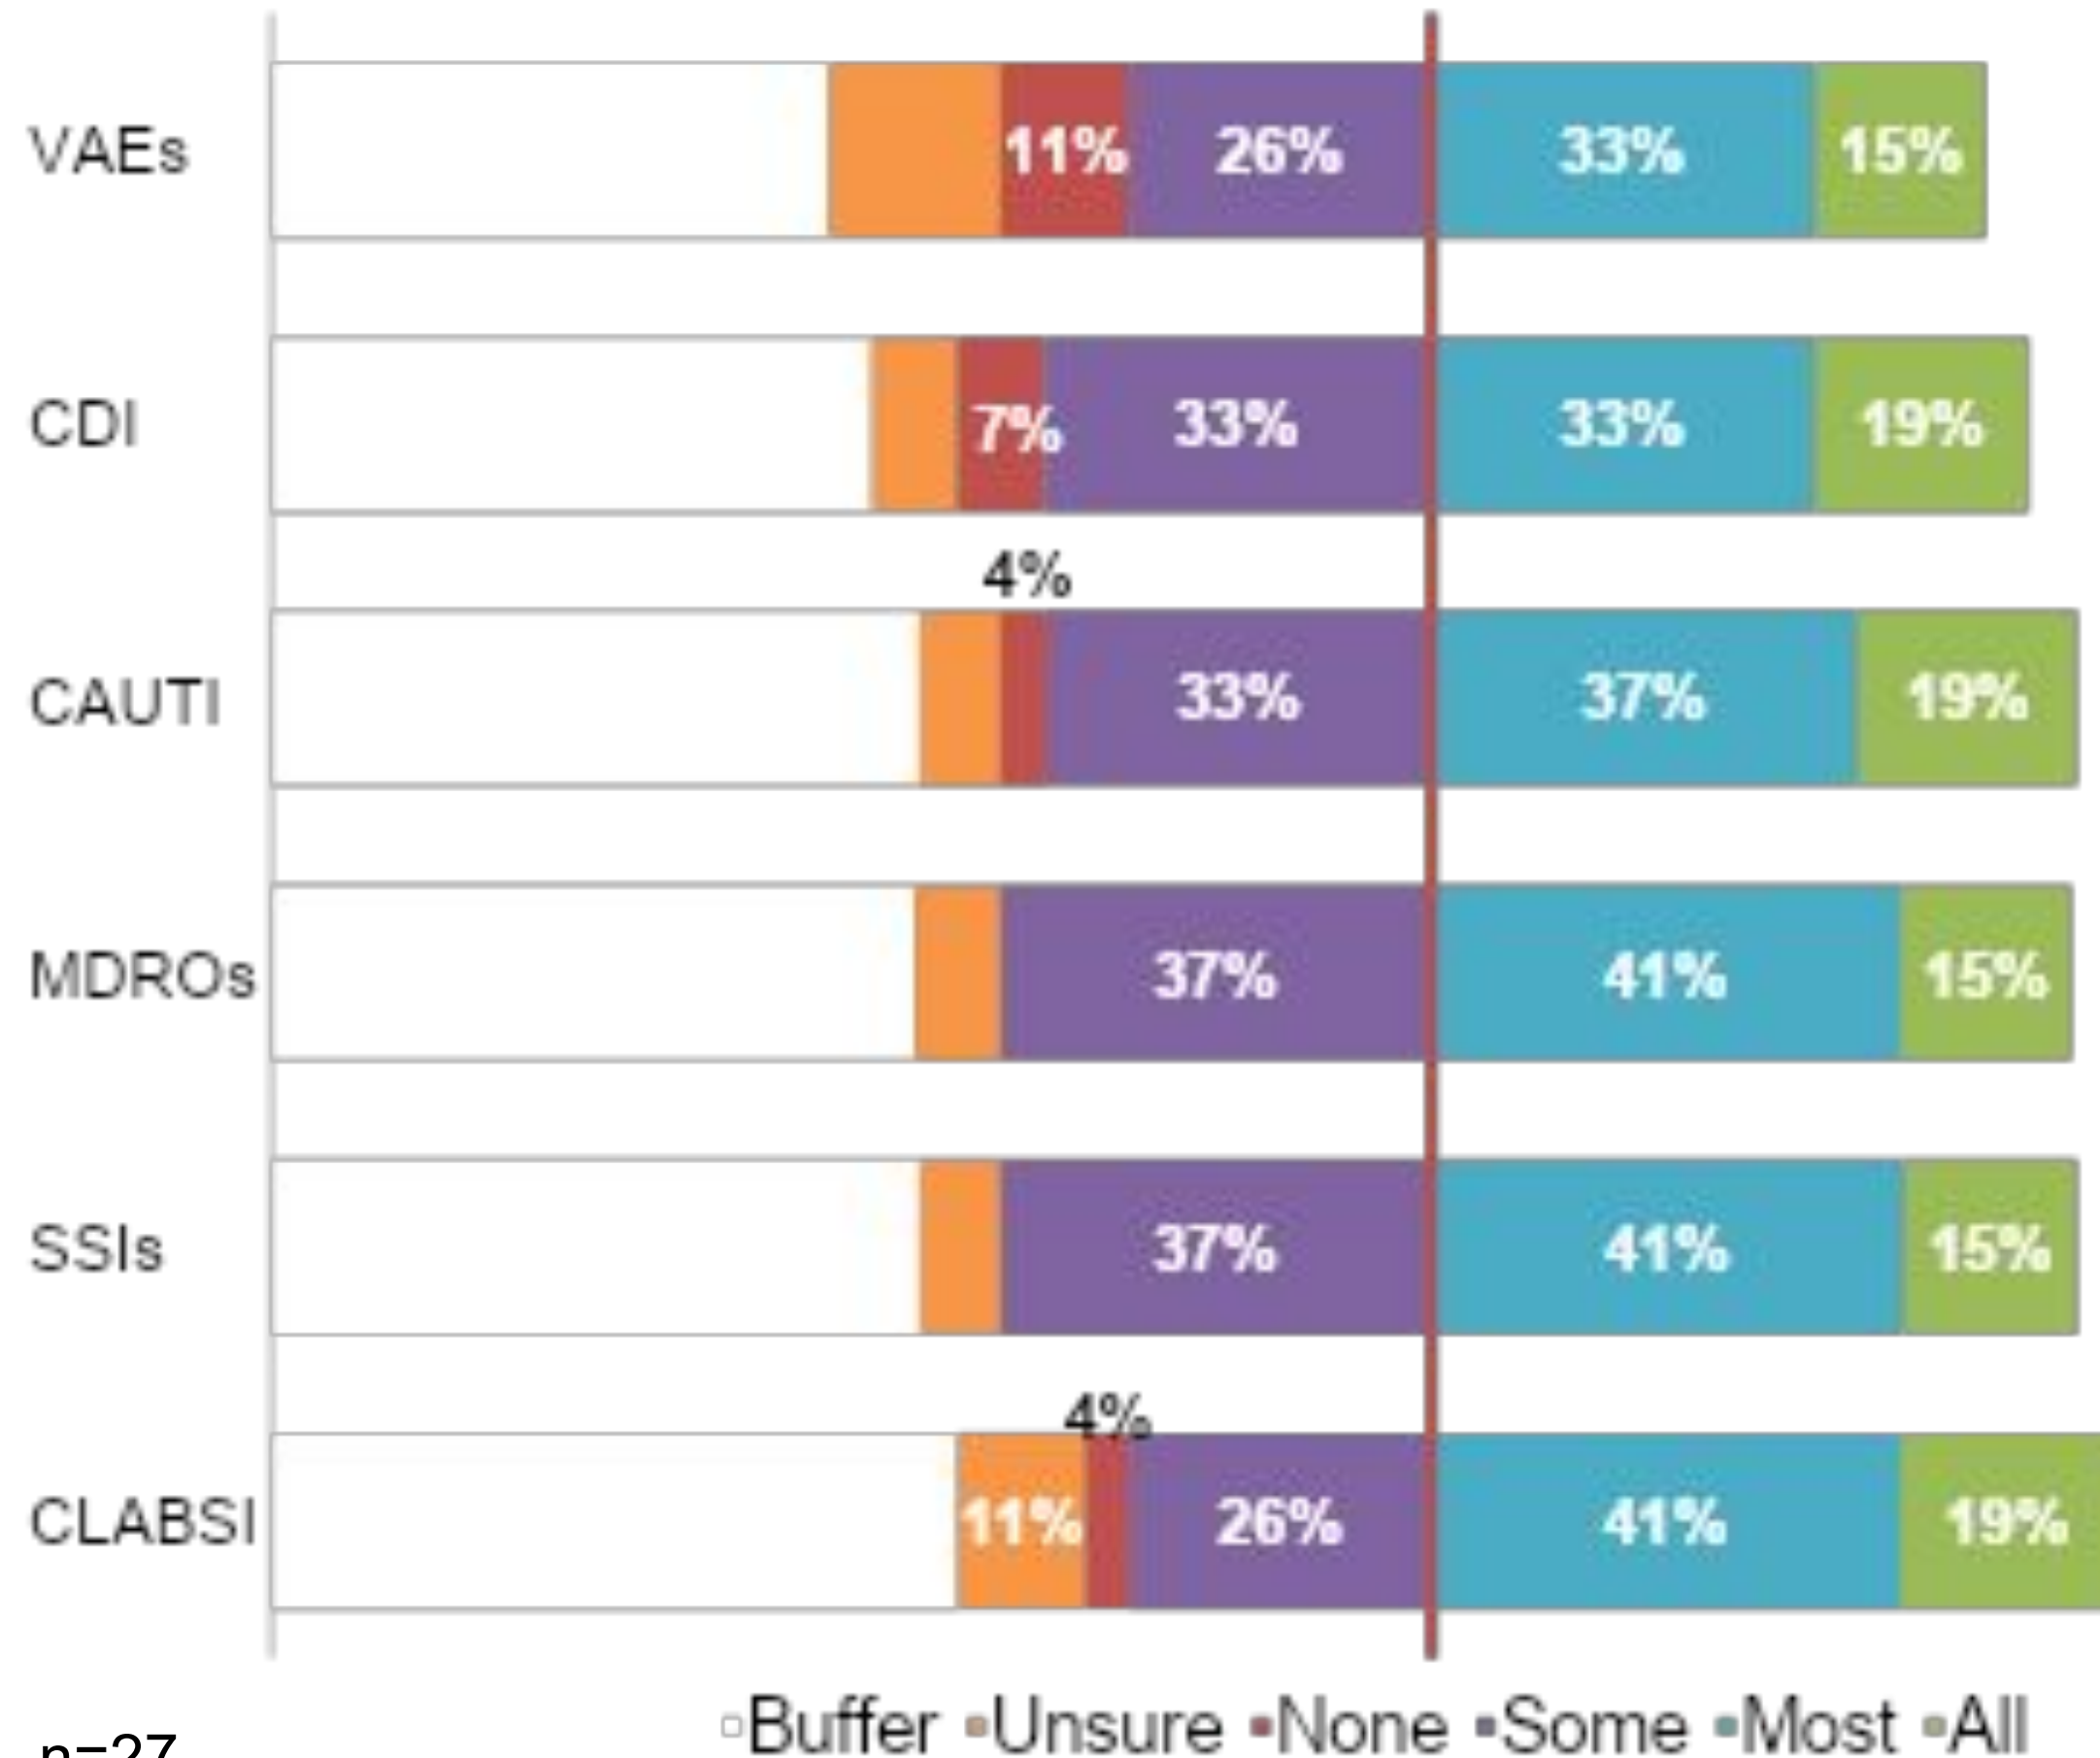

54% of IPs are somewhat to extremely concerned about having time to complete IPC trainings

Resource Needs

HAI/AR Director Reported: Do the IPs in your state/territory have the necessary resources to implement programs for the following HAIs:

Approximately 50-60% of IPs were reported by HAI/AR directors to have most or all the necessary resources to implement programs for the listed HAIs in their state/territory.

IP Reported: Do you have the necessary resources to implement programs for the following HAIs in your facility:

- Majority of IPs reported they have most or all the necessary resources to implement programs for the listed HAIs in their facilities.
- VAEs and SSIs were reported as the HAIs most lacking in necessary resources
 - **Note:** Some facilities may not have ventilators which may contribute to reporting VAE resource lack

Top 5 Resources that are lacking for IPC program process implementation:

HAI/AR Directors reported:

- Selection/Purchasing
- Water Management
- Construction Risk Mitigation
- Environmental Rounding
- Non-Critical Device Reprocessing

IPs reported:

- Selection/Purchasing
- Non-Critical Device Reprocessing
- Construction Mitigation
- Sterilization
- Water Management

Top 5 Technology Resources that are lacking for IPC program process implementation:

HAI/AR Directors reported:

- Construction Air Quality Monitoring
- HVAC System Monitoring & Verification
- Antimicrobial Stewardship
- Competency-Based Training Programs
- Vendor Vaccination Tracking & Documentation

IPs reported:

- Vendor Vaccination Tracking & Documentation
- Construction Air Quality Monitoring
- HVAC System Monitoring & Verification
- Employee Health
- Staff Vaccination Tracking & Documentation

Key Takeaways & Conclusions

UNMC | NEBRASKA MEDICINE
GLOBAL CENTER
FOR HEALTH SECURITY

- IPs desire more comprehensive onboarding and training
- Time constraints and training affordability are top concerns for IPC development.
- HAI/AR Directors and IPs differ in their concerns about facility HAI issues.
- Positive relationships with facility leadership impacts job satisfaction

Next Steps & Future Directions

- **Enhanced Communication & Collaboration:**
 - **Goal: Strengthen network among IPs, healthcare administrators, public health officials, and professional organizations**
- **Data Monitoring & Evaluation:**
 - **Goal: Ensure the effectiveness of IPC interventions and address evolving needs of IPs**
- **Research and Innovation in IPC:**
 - **Goal: Drive advancement in IPC field through innovative research and solutions.**

- **90-Day Survival Guide (under development)**
 - Support and resources for IPs new to the field
- **Infection Prevention & Control Webinars**
 - Topics driven by needs assessment data and IP requests
 - CEUs available
 - Office hours available to answer questions
- **SLICE: Self-Led Infection Control Evaluation Tool**
 - 17 topic-specific infection prevention domains
- **XR Education**
 - Sterile Processing Department
