Barriers and Facilitators Activity

Action Step: Identify Barriers and Facilitators for Implementing, Expanding, or Improving Evidence-based Overdose Prevention Interventions

Overview
Identify potential challenges in implementing interventions for overdose prevention.

Purpose
The purpose of this activity is to categorize implementation barriers and facilitators with your team. This assessment can help your team identify the potential challenges in implementing evidence-based interventions/programs for overdose prevention.

When to Use This Resource
Use this resource when focusing on identifying barriers and facilitators to a program that is being newly implemented, or one your team has already implemented that you want to reflect on (to make adaptations, identify supports, etc.).

Activity Details

Who to Involve
Invite people to this meeting who can speak about barriers and facilitators from different perspectives. Consider diversity and inclusivity, including people who use drugs and their family/friends.

Time Needed to Complete
60–90 minutes; time depends on the number of prioritized evidence-based strategies/programs your team has identified.
Module 3 Resource Barriers and Facilitators Activity

Format & Filetype
Structured Slide Deck in PPT.

Resources/Materials Needed
- Handouts; flipcharts, sticky notes, and markers or virtual whiteboard

Companion Resources:
- Module 3 System Mapping Tool

What's Included
- Detailed instructions
- Next steps
- Completed examples
- Facilitator notes
