Prioritization Activity

Action Step: Prioritize Interventions

Overview
Determine priorities based on ease and importance of options.

Purpose
The purpose of this team activity is to help your public health and safety partnership prioritize the following items:
- the evidence-based interventions your partnership could potentially implement, and/or
- the barriers related to the chosen evidence-based intervention(s).

When to Use This Resource
This is a general activity that can be used in any situation where you need to establish and prioritize a list of items (i.e., evidence-based interventions or barriers to implementation) when your public health and safety partnership is engaged in Module 3: Collaborative Problem Solving and Coordinated Interventions.

Activity Details

Who to Involve
Public health and safety members.

Time Needed to Complete
Your team can allocate as much time as needed but should allow at least 20–30 minutes.
Format & Filetype
Structured Slide Deck in PPT.
