

NORTHERN KENTUCKY
Independent District
Health Department

Linking People and Resources for a Healthy Community

COPY

The Northern Kentucky Health Department and the Northern Kentucky Community Health Committee want to personally thank you for helping us accomplish a major community health goal. We have completed the health objective delegated to us by Forward Quest as part of their plan: *Quest, A Vision for Northern Kentucky*. The objective was to, "Establish a Healthy Community Task Force, appointed by the three Judge Executives, to develop a master plan for working toward a positive state of health and to develop initiatives to achieve these objectives."

The enclosed *Public Health System Improvement Plan 2003 (PHSIP)* represents the final installment of the three-volume *Northern Kentucky Community Health Plan (CHP)*. The *CHP Volume I (1996)* and *Volume II (1999)*, and the *CHP Volume III: PHSIP (2003)* completes the "master plan" requested by Forward Quest. You are receiving this complimentary copy of the *CHP Volume III: PHSIP 2003* because you helped in some way with the development of the CHP since this project began in 1993.

Now for the most important and powerful part of the entire process: implementation of the plan. We once again turn to you for your expertise, your energy and your leadership in the community. We need your participation to continue the success of this project. Implementation involves utilizing the strategies in *Volume III: PHSIP* to put into action the objectives in *CHP Volumes I & II*.

Please look through the enclosed plan and think about how you can contribute to your community by identifying the parts of this vital plan that you are interested in implementing. Once you have done so, complete and return the enclosed **Community Information and Participation Survey** to us in the stamped self-addressed envelope. We can then begin to contact organizations and coalitions that are working on these priority public health objectives, and help you get involved with others in your areas of interest. We encourage you to share this form with your colleagues.

Sincerely,

Gary Crum, Ph.D.
District Director of Health
