Heat & Health Tracker

Extreme heat events have long threatened public health in the United States. The CDC Heat & Health Tracker provides local heat and health information so communities can better prepare for and respond to extreme heat events. Use the search on the right to explore how extreme heat affects your county, populations that are at risk, and resources for response.

Heat & Health Tracker

Fulton County, GA

Extreme heat can lead to heat stroke, heat cramps, heat exhaustion, dehydration, and death. Anyone can be at risk, but some are more vulnerable, including pregnant women, people with heart or lung conditions, young children, older adults, athletes, and outdoor workers. This county profile provides specific information on its vulnerable populations, how extreme heat events are changing in the community, and critical resources for during an extreme heat event.

56.6°F

Today's High Temperature for Fulton County, GA

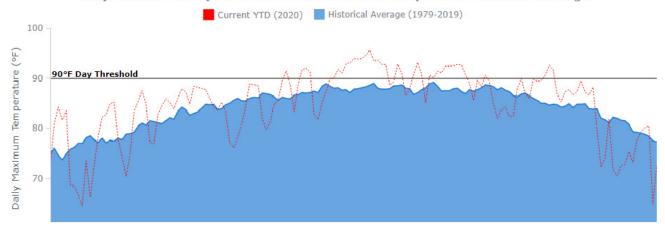

36

Number of days above 90°F since April 21

Number of projected heat days in 2050 is 58

Daily Maximum Temperature for Current Season compared to Historical Average
