

PANDEMIC INFLUENZA PLANNING ELECTRONIC TOOLKIT FOR WISCONSIN SCHOOLS

Every school needs to develop a plan to address a possible influenza pandemic. Leading health authorities tell us that it is not a matter of if a pandemic will occur, but rather when it will occur. Making this plan a part of the school's overall crisis or safety plan allows the developers to move ahead quickly using many of the components which are already in place. This electronic toolkit is designed to help schools quickly and easily locate the large volume of pandemic influenza information and resources that are already available around the country. A variety of topics relevant to both seasonal and pandemic influenza are listed and sample web site links are provided. As new materials become available, updates will be added.
