 - CERP and CPEU for one year post webinar date.

Upcoming Webinar

Navigating Organizational Change for Breastfeeding Success

Discuss how communities are effectively connecting with birthing facilities and local medical providers to improve continuity of care from the prenatal period until breastfeeding weaning.

May 22nd from 2pm to 3:30pm ET

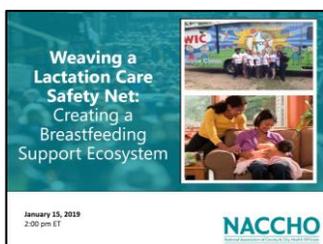

Register Here: <https://adobe.ly/2GUfUZO>

Navigating Organizational Change for Breastfeeding Success

Focuses on internal continuity of care to help create a breastfeeding ecosystem, and addresses the organizational systems change we need to implement a seamless lactation safety net within groups that serve parents and babies.

Link for CEs: <https://bit.ly/2GNbfr4>

Creating a Breastfeeding Support Ecosystem

Addresses the public health significance of community breastfeeding continuity of care to increase breastfeeding duration and exclusivity rates, and mechanisms that can be used to create a breastfeeding ecosystem.

Published Materials

Peer Reviewed Journal Articles

Read NACCHO's open access articles in the *Journal of Human Lactation*.

["Breastfeeding in the Community: Addressing Disparities Through Policy, Systems, and Environmental Changes Interventions,"](#) the authors share practice-oriented strategies for agencies seeking to implement community-level breastfeeding interventions. Access the issue at bit.ly/NACCHOpse

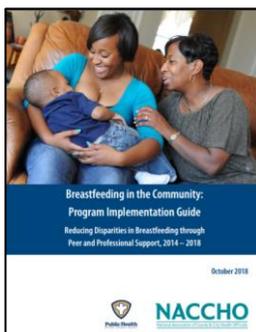

["Breastfeeding in the Community: Sharing Stories on implementations That Work"](#) shares barriers and facilitators of breastfeeding community-level implementation projects and highlights the work of 19 NACCHO breastfeeding project grantees. Access the issue at bit.ly/NACCHOstories

NACCHO Exchange Summer 2018 - Breastfeeding

The summer issue of NACCHO Exchange is available online. This issue, which became available during National Breastfeeding Month 2018, showcases the ways in which local health departments and other community-based organizations are implementing family-friendly policy, and other policy, systems, and environment changes to increase breastfeeding rates in their communities.
