Advanced Threats Demand an Advanced Cybersecurity Partner. We specialize in providing comprehensive cybersecurity services to safeguard your business from ever-evolving cyber threats.

Public Health[®]
Prevent. Promote. Protect.

Our Services

On-Call Support

Virtual CISO and Security Team

24/7/365 Threat Detection & Response

Security Operations Center (SOC) Services

Dark Web Monitoring

Attack Surface Monitoring

Exposure Management

Yearly Vulnerability and Penetration Test

Business Continuity & Disaster Recovery

Critical Operations Management

Why Choose Us?

Unlike many MSSP's, we take the time to gain a thorough understanding of your network and business. Beginning with an initial focused customer engagement and baselining period.

- ✓ Risk Management
- ✓ Virtual Team
- ✓ Cyber Threat Intelligence / Alerts
- ✓ Threat Detection & Prevention

Tiers

Services

● Tier 1 (Base Subscription)

- 24/7/365 Threat Monitoring
- Security Operations: 24/7 Detection, Investigation, Escalations
- Turnkey Web Application Protection and Monitoring
 - Geo Gate Protection
 - DDOS Protection
 - WAF and API Protection
 - BOT Hunter
- Vulnerability Scanning, Discovery, and Patching
- Managed Cloud-Based Elastic SIEM
- Dashboard and Reporting
- NIST and MITRE Attack Chain Monitoring
- 24/7 /365 Analyst and Engineering Support
- Sapphire Artificial Intelligence Insights and Autonomous Response (SOAR, XDR, EDR, NGAV)
- O365 Monitoring, Detection, and Response
- Security Scorecard Integrated License
- Machine Learning and User Behavior Analytics Anomaly Detection
- Risk Scoring and Recommendations
- Threat Hunting and Intelligence
- 365 Day Log Retention

● Tier 2 (Includes Tier 1)

- Member Annual Security Risk Assessment
- Cybersecurity Awareness Training
- Security Policies review and maintenance
- Anti-Spam, Anti-Phishing and Domain Protection for email security
- Vulnerability / Penetration Testing
- 24/7/365 Dark Surface / Dark Web Monitoring
- Business Continuity and Strategy Development
 - Disaster Recovery Planning
 - Third-party and Vendor Resilience Management
 - Crisis Communications Planning
 - Training, Testing, and Continuous Improvement

● Tier 3 (Includes Tier 1 & 2)

- Virtual Chief Information Security Officer / Security Team On-Call Support
- Managed Security Policy and Procedures Management & Orchestration
- Identity and Access Management
- Multi-Factor Authentication
- Secure Access Zero Trust
- Emergency Response Advisory Services
- Grant Research and Writing Services

Unlike many Managed Security Service Providers (MSSPs), we take the time to genuinely understand your network and business needs. We begin with an initial focused engagement and conduct a baseline assessment. This foundation allows us to utilize our advanced managed services platform to implement a threat-intelligence-driven analysis methodology. As a result, we can quickly categorize events and employ high-confidence analysis cycles to tackle advanced threats. This approach enables us to navigate the incident response phases— from detection to remediation— both deliberately and efficiently.
